

Current Cost Showcases New Technologies at Metering Europe

Leading global provider of in home energy displays unveils colourful new multi-channel EnviR monitor and demonstrates the future of remote domestic energy use with its Interactive House

Award-winning British company [Current Cost Ltd](#) is proud to announce that it will be showcasing its innovative technologies – including exciting new high-tech product launches - at stand L29.

Among the exhibits is an animated click-through demonstration of how the technology specialist's new, multi-channel [EnviR](#) device has the ability to monitor gas and water as well as electricity. A full range of products will be available for visitors to explore including the 100 per cent accurate EnviR meter reader with its colourful and engaging choice of skins.

In addition, visitors to the stand will have the opportunity see how the company's C² technology can be used to remotely control devices around the home at the Current Cost Interactive House. There will also be a demonstration of how energy monitors can be used to display changeable peak and off-peak tariffs when used in conjunction with SIM technology.

"We are really excited to be showcasing our new technology at the [Metering Europe](#) event," says Current Cost managing director, Martin Dix. "The ability to offer our customers total flexibility with bespoke products has always been a key focus for Current Cost and all of our high-tech, low cost solutions are specially designed to help users identify energy wastage."

UK-based Current Cost has enjoyed rapid expansion over the past five years, positioning itself within the clean tech market place as a provider of information on home electricity usage that both empowers consumers and provides vital support to utilities and service provider partners. Current Cost's engaging and interactive devices are already being used by well over a million domestic users in the UK and overseas.

Notes to Editors

[Current Cost](http://www.currentcost.com) was founded in 2004 and is the UK's most experienced manufacturer of real time displays for monitoring domestic electricity usage. The company continues to lead the market in innovation and was the first manufacturer to supply RTDs to the Top Six energy companies. Current Cost continues to lead the market in innovative RTD design and is the largest supplier worldwide, with over one million monitors installed to-date. C² proprietary technology is found in all the company's range of devices and is available in individual recognition plugs, standard meters and load management devices. The information gathered by the C² software can be downloaded to a PC or as a part web application, so that households, housing associations and any other organisation can track improvement in energy efficiency and wastage reduction.
